

ILLUMINATING ANTIOXIDANT FACIAL TREATMENT w/ EYE CARE

SUGGESTED RETAIL \$125-\$225

SUGGESTED TIME 45 minutes

SKIN TYPES Appropriate for all skin types.

DESCRIPTION

This peptide-rich brightening facial is excellent at increasing radiancy and reducing skin roughness and fine lines. By combining the benefits of encapsulated resveratrol with scientifically proven peptides and niacinamide, the skin is transformed in under 45 minutes. Beautiful results such as brighter, smoother more even toned skin is often noticeable following this calming, antioxidant facial.

BENEFITS

- Digests dead skin cells and increases cellular turnover.
 - Restore protective barrier function.
 - Boosts hydration.
 - Boost collagen production.
 - Lightens and brightens dull skin.
 - Reduce inflammation and redness.
 - Protects against free radical damage.
-

DIRECTIONS

STEP 1 CLEANSER: Thoroughly cleanse the face using the Exfoliating Enzyme Wash. We suggest massaging the cleanser in circular motions over the face and neck area with fingertips until make-up, oils, and daily build-up have been removed. Leave on the skin for up to 2 minutes. Rinse thoroughly.

STEP 2 DOUBLE CLEANSE: Thoroughly cleanse the face for a second time using the Corrective Wash with wasabi. We suggest massaging the cleanser in circular motions over the face and neck area with fingertips to stimulate blood flow to the skin. Rinse thoroughly.

STEP 3 EXFOLIATION: After the skin tissue has been stimulated, exfoliate dead skin cells by applying a small amount of the Cranberry Scrub to a clean dry face with hands or facial brush. Work the scrub in a circular motion. Massage approximately 2-3 times. Clean with a warm damp facecloth until all scrub has been removed.

STEP 4 MASK: After exfoliating, apply an ample amount of the O2 Oxygen Fruit Mask. Allow it to penetrate for 5-7 minutes. You may reactivate the mask with steam for an additional 2-3 minutes. Remove with tepid/warm sponges or soft towel.

STEP 5 EYE CARE (OPTIONAL): Apply a thin layer of Firming Peptide Crème under each eye. Then apply a bio-active microfusion strip on top of the Firming Peptide Cream. Leave the microfusion strips under each eye until the remainder of the facial.

STEP 6 LIGHTWAVE IR LIGHT: Expose the skin to 10 minutes of IR Light to reduce inflammation, detoxify the skin tissue, and allow for better product absorption from the Topical Light Infusion.

STEP 7 TLI INFUSION: To significantly reduce redness, increase antioxidant protection and get the skin glowing, apply the 2-Step TLI Resveratrol Illuminating Complex Booster and infuse in for 16 minutes under the corresponding setting of TLI.

STEP 8 PROTECT: Remove the micro fusion strips from under each eye (if used). Apply a dime size amount of the Hydrating Recovery Gel followed by the Intense Antioxidant to fully protect the skin from internal and external stressors.

CAUTIONS OR NOTES

When applying product around the eye area, be cautious not to get product in the eyes or to aggressively rub the delicate skin tissue surrounding the eyes.
