

New and improved LIGHTENING PRO PEEL

pH	1.0
SKIN TYPES	Appropriate for acne-prone, mature and sun damaged skin.
DESCRIPTION	This superficial peel combines 25% AHA (Alpha Hydroxy Acid) with 50% Glycolic Acid for an effective skin peel that targets and reverses uneven skin tone and discoloration, and jump starts a complete skin rejuvenation process. This peel helps to reprogram damaged skin cells to ensure proper information is transmitted from one cell receptor to the next while inhibiting skin discoloration and melanin production. Skin generally appears brighter with noticeably lighter, even skin tone.
BENEFITS	<ul style="list-style-type: none">• Improves skin discoloration.• Lightens and brightens dull skin.• Aids in decreasing ROS.• Evens out skin tone and texture.• Reprogram damaged cells.
DIRECTIONS	Professional Use- Before applying peel, perform a patch test to determine the clients skin sensitivity. Refer to ABI's Professional Protocols for direction of use.
POWER PURE™ INGREDIENTS	<p>50% Glycolic Acid- An effective alpha hydroxyl acid (AHA), generally found in sugar cane, sugar beets and unripe grapes that improves hydration by enhancing moisture intake. It does this by reacting with the upper layer of the epidermis, dissolving the bonds that hold dead skin cells together, allowing essential moisture to penetrate the skin. It also helps to increase cellular turnover, refine skin texture, and assist in skin lightening while also providing better penetration for other products due to its small molecular structure.</p> <p>Bellis Perennis (Daisy) Flower Extract- Is an extract from the Daisy Flower that has proven to naturally lighten skin discoloration by reducing melanin production and inhibiting tyrosinase activity. It also has the unique function of being an ROS (Reactive Oxygen Species) scavenger.</p>
ACTIVE INGREDIENTS	<p>25% Phytic Acid - Naturally present in legumes and seeds, this potent ingredient provides dual-action exfoliation and skin brightening effects. It helps to inhibit the impact of skin aggressors that can cause dullness, promoting skin clarity and glow.</p> <p>Phytic acid is an effective AHA (alpha hydroxyl acid) that is derived from micro-algae, legumes and seeds. It is known for its brightening properties as well as its ability to exfoliate dead skin cells without provoking skin irritation. Phytic acid also increases cellular turnover, helping to diminish fine lines and wrinkles while also helping with pigmentation and the appearance of pores.</p> <p>Glycyrrhiza Glabra (Licorice) Rhizome/Root- Naturally aids in improving skin discoloration.</p>
COMPLETE INGREDIENT LISTING	50% Glycolic Acid, 25% Phytic Acid, Glycerin, Hamamelis Virginiana (Witch Hazel) Water, Bellis Perennis (Daisy) Flower Extract, Polysorbate 20, Glycyrrhiza Glabra (Licorice) Rhizome/Root, Xanthan Gum
CAUTIONS	Patch Test Required. Avoid getting the product in eyes or open sores and wounds.
AVAILABLE SIZES	Retail: Not available-Professional Only Product Professional: 2 oz.
